

How to join K-Link with Your website

Alessio Vertemati

What we will see?

- What types of integrations are possible
- What steps are necessary to integrate a search on your website

2 type of integrations

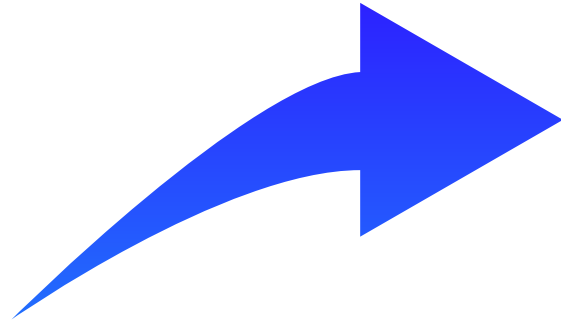

Search from the website on a K- Link

Search K-Link Community...

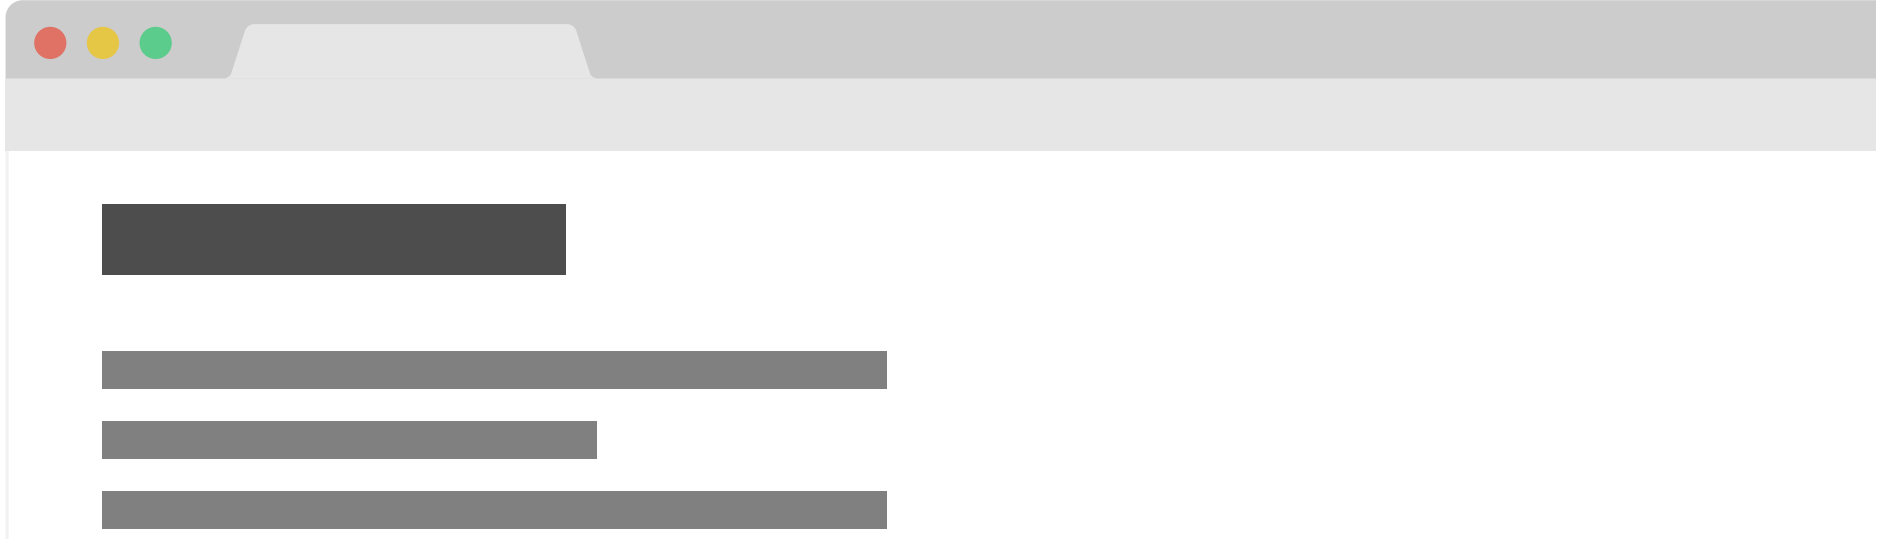

2 type of integrations

Publish to K-Link from the website

K-Link

A light gray rectangular box with a thin blue border. Inside the box, the text "K-Link" is centered at the top. Below the text is a blue outline icon of a document with a paperclip, representing a link or attachment.

Let's integrate the search on "Improved KM" in our
OneOffTech website

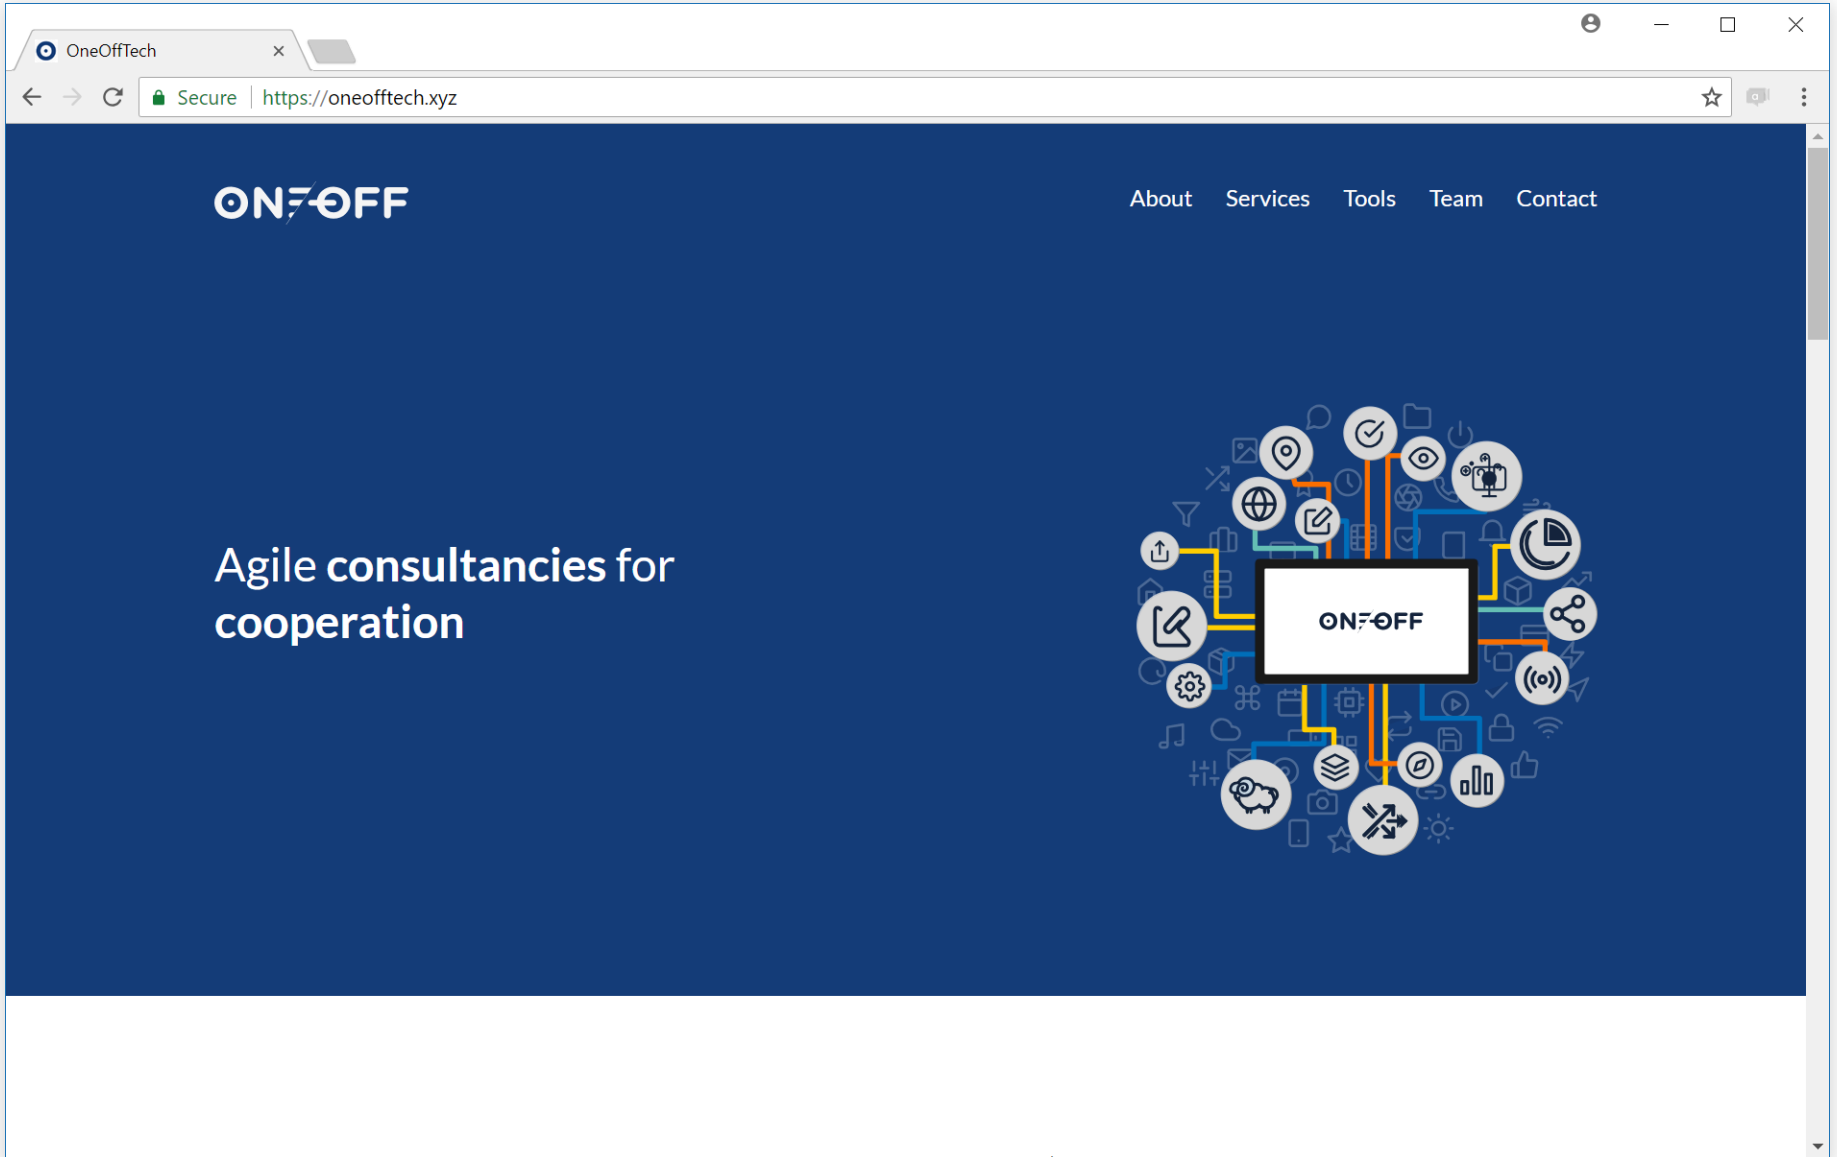

Improved Knowledge Management Community

powered by K-Link

[API](#)

[JOIN](#)

[CONTRIBUTE](#)

ON=OFF

[About](#) [Services](#) [Tools](#) [Team](#) [Contact](#)

**Agile consultancies for
cooperation**

The K-Link has an Application Programming Interface
(*API*) we can use

Swagger UI x

localhost:8181/docs

POST /api/3.0/data.delete Delete piece of data from the search index. 

POST /api/3.0/data.get Get detailed information of piece of data in the search index. 

POST /api/3.0/data.status Get the status information of a Data piece in the search index. 

POST /api/3.0/data.add Add piece of data to the search index. 

POST /api/3.2/data.search Allows to query the index and returns search results. 

Allows to query the index and returns search results. This API requires the `data-search` permission.

Parameters Try it out

Name	Description
------	-------------

body * required

(body) Example Value | Model

```
{
  "params": {
    "search": "Sherlock Holmes",
    "filters": "properties.language:en AND properties.created_at:[\"2008-07-28T14:47:31Z\" TO NOW] AND properties.updated_at:[\"2008-07-28T14:47:31Z\" TO NOW] AND properties.size:[717589 TO 717591] copyright.owner.name:\"KLink Organization\" AND copyright.usage.short:\"MPL-2.0\"",
    "aggregations": {
      "properties.language": {
        "limit": 5,
        "counts_filtered": false
      }
    },
    "copyright.usage.short": {
      "limit": 4,
```

The API is protected so we need a developer account

Applications

[Add](#)

Name	Domain	Permission(s)	Status	Action
OneOffTech	https://oneofftech.xyz/	data-search, data-view	Enabled	-

Step 1

- Get a [developer account](#) on the community
- Get a token for my website

Authentication

- The K-Link imposes the authentication of the application that wants to perform actions
- The application must run on a domain, e.g. `website.com`
- The community administrator can deny the registration

github.com/k-box/k-search-client-js

Add the Open Source K-Link client to your site

```
<!-- CSS -->  
<link rel="stylesheet" href="https://releases.klink.asia/k-sea  
  
<!-- Javascript -->  
<script type="text/javascript" src="https://releases.klink.asi
```

Configure the library

```
<script type="text/javascript">
ksearch({
  token: '<API_TOKEN>',
  url: '<API_URL>',
  selector: '<YOUR_INPUT_DOM_SELECTOR>' // e.g. .k-search
});
</script>
```

ON=OFF

cooperation**

A bit more on the library

There are various configuration options Behind it there is a client that can be used without the UI, so you can create your interaction

```
npm in
```

```
yarn a
```
